

Save a webpage as a file

This information applies to Windows Internet Explorer 7 and Windows Internet Explorer 8.

If you want to save the webpage you're viewing as a file on your computer, you can do so.

To save a webpage as a file

1. Open Internet Explorer by clicking the **Start** button , and then clicking **Internet Explorer**.
2. Go to the webpage you want to save.
3. Click the **Page** button, and then click **Save As**.
4. Navigate to the folder where you want to save the webpage. By default, webpages are saved in the **Documents** folder.
5. Type a new name in the **File name** box if you want to change the name.
6. In the **Save as type** box, do one of the following:
 - To save all the files associated with the page, including graphics, frames, and style sheets in their original format, select **Webpage, complete**.
 - To save all information as a single file, select **Web Archive, single file (*.mht)**.
 - To save just the current HTML page, without graphics, sounds, or other files, select **Webpage, HTML only**.
 - To save just the text from the current webpage, select **Text File**.
7. Click **Save**.
